

Dr. Paul Judge

CHIEF TECHNOLOGY OFFICER

Dr. Paul Q. Judge currently serves as Chief Technology Officer and Senior Vice President for Secure Computing. Under his technology leadership, Secure Computing has grown to its current position as the global leader in messaging security, protecting more than 20,000 enterprises worldwide.

Judge was the Chief Technology Officer at CipherTrust, where he managed the research and product management teams and was the lead inventor on all patented messaging security technologies. CipherTrust was the market share leader in messaging security prior to its merger in 2006 with Secure Computing. Currently, Dr. Judge leads all Secure Computing research and advanced product development and product management, and is the lead inventor for 18 patent-pending security technologies.

Prior to his tenure at CipherTrust, Dr. Judge worked with IBM and NASA. Having been named to MIT's list of the top 100 young innovators in the world in 2003, Dr. Judge has spearheaded multiple research initiatives and founded the Internet Research Task Force's Anti-Spam Research Group.

Dr. Judge is a recognized authority on information security issues, having authored numerous papers that have been published in leading academic journals, presented at multiple industry and academic conferences including COMDEX, Interop, INBOX, RSA, MIT Spam Conference and InfoSecurity. Dr. Judge has also been featured in hundreds of national media outlets including CNN, Forbes, Business Week, Fox News and the LA Times.

Dr. Judge holds a B.S. in Computer Science from Morehouse College, and received his Ph.D. and M.S. in Network Security from Georgia Tech.
